01 Product overview

The Cisco C9200CX-12T-2X2G-A is a Catalyst 9200CX compact fanless switch that provides 12x 10/100/1000 RJ-45 data ports and 2x 1G copper + 2x 10G SFP+ fixed uplinks. It delivers 70 Gbps of switching capacity and a forwarding rate of 52.08 Mpps, ensuring wire-speed performance for everyday business traffic. Its fanless design keeps operation completely silent, so it can be installed close to users.

The Catalyst 9200CX compact switches pack the Catalyst 9000 software experience into a silent, fanless enclosure designed for spaces outside the wiring closet - classrooms, retail floors, hospitality rooms and small offices. They run Cisco IOS XE with full Layer 3 features, support up to 16 virtual networks for SD-Access, and offer secure boot, MACsec and Catalyst Center automation in a footprint that can be desk-, wall- or rack-mounted.

This part number ships with the Network Advantage software license; Network Advantage adds advanced routing, segmentation and high-availability capabilities on top of Network Essentials. A Cisco DNA / Catalyst subscription is ordered together with the switch. It is well suited to enterprise wiring closets, branch offices and campus access layers.
