## 01 Product overview

The Cisco MS130-24 is a Meraki MS130 cloud-managed access switch that provides 24x 10/100/1000 RJ-45 ports and 4x 1G SFP uplinks. It delivers 56 Gbps of switching capacity, ensuring wire-speed performance for everyday business traffic. Its fanless design keeps operation completely silent, so it can be installed close to users.

As part of the Cisco Meraki portfolio, the MS130 is configured, monitored and updated entirely from the Meraki cloud dashboard. Zero-touch provisioning, automatic firmware updates, live troubleshooting tools, topology views and integrated alerting dramatically reduce the effort of operating distributed sites, while features such as 802.1X, access policies, voice VLANs and QoS cover typical branch and office requirements. An active Meraki MS license is required for operation.

It is ideal for multi-site organisations that want consistent, centrally managed branch switching. ServerInvest supplies Cisco switching across Europe - contact us for pricing, availability and project quotes.
