01 Product overview

The Cisco MS130-48X is a Meraki MS130 cloud-managed access switch that provides 48x PoE+ ports: 40x 10/100/1000 + 8x 2.5G Multigigabit and 4x 10G SFP+ uplinks, with a 740 W PoE+ (802.3at) power budget for phones, wireless access points and cameras. It delivers 200 Gbps of switching capacity, ensuring wire-speed performance for everyday business traffic.

As part of the Cisco Meraki portfolio, the MS130 is configured, monitored and updated entirely from the Meraki cloud dashboard. Zero-touch provisioning, automatic firmware updates, live troubleshooting tools, topology views and integrated alerting dramatically reduce the effort of operating distributed sites, while features such as 802.1X, access policies, voice VLANs and QoS cover typical branch and office requirements. An active Meraki MS license is required for operation.

It is ideal for multi-site organisations that want consistent, centrally managed branch switching where powered endpoints such as IP phones, Wi-Fi access points and security cameras need to be supported.
