01 Product overview

The Cisco C9200L-48PL-4G-A is a Catalyst 9200L fixed-uplink campus access switch that provides 48x 10/100/1000 ports with partial PoE+ and 4x 1G SFP fixed uplinks, with a 370 W PoE+ (802.3at) power budget for phones, wireless access points and cameras. It delivers 104 Gbps of switching capacity and a forwarding rate of 77.38 Mpps, ensuring wire-speed performance for everyday business traffic.

The Catalyst 9200L variants keep the Cisco IOS XE software foundation of the Catalyst 9000 family while using fixed uplinks and a shallower chassis, making them a cost-optimised choice for wiring closets and branch offices. They support Layer 3 routing, StackWise-80 stacking, field-replaceable power supplies, Cisco DNA Center/Catalyst Center automation and the Cisco Trustworthy Solutions security stack, including secure boot and signed images.

This part number ships with the Network Advantage software license; Network Advantage adds advanced routing, segmentation and high-availability capabilities on top of Network Essentials. A Cisco DNA / Catalyst subscription is ordered together with the switch. It is well suited to enterprise wiring closets, branch offices and campus access layers where powered endpoints such as IP phones, Wi-Fi access points and security cameras need to be supported.
