01 Product overview

The Cisco C9300L-24P-4G-A is a Catalyst 9300L fixed-uplink enterprise access switch that provides 24x 10/100/1000 PoE+ ports and 4x 1G SFP fixed uplinks, with a 505 W PoE+ (802.3at) power budget for phones, wireless access points and cameras. It delivers 56 Gbps of switching capacity and a forwarding rate of 41.66 Mpps, ensuring wire-speed performance for everyday business traffic.

The Catalyst 9300L delivers the Catalyst 9300 feature set - Cisco IOS XE, UADP 2.0 forwarding, SD-Access, MACsec and Catalyst Center automation - with fixed uplinks for deployments that do not need modular network modules. StackWise-320 stacking, field-replaceable platinum-rated power supplies and fans, and full Layer 3 routing make it a strong fit for enterprise wiring closets that want Catalyst 9300-class software at a lower entry point.

This part number ships with the Network Advantage software license; Network Advantage adds advanced routing, segmentation and high-availability capabilities on top of Network Essentials. A Cisco DNA / Catalyst subscription is ordered together with the switch. It is well suited to enterprise wiring closets, branch offices and campus access layers where powered endpoints such as IP phones, Wi-Fi access points and security cameras need to be supported.
