01 Product overview

The Cisco C9300LM-24U-4Y-A is a Catalyst 9300LM short-depth enterprise access switch with 25G uplinks that provides 24x 10/100/1000 Cisco UPOE ports and 4x 1/10/25G SFP28 fixed uplinks, with a 420 W Cisco UPOE (60W) power budget for phones, wireless access points and cameras. It delivers 248 Gbps of switching capacity and a forwarding rate of 184.51 Mpps, ensuring wire-speed performance for everyday business traffic.

The Catalyst 9300LM is a shorter-depth member of the Catalyst 9300 family with four fixed 25G SFP28 uplinks. It keeps the Cisco IOS XE software, UADP-based forwarding, SD-Access support, MACsec security and StackWise-320 stacking of its larger siblings, while its compact chassis suits shallow racks and space-constrained wiring closets.

This part number ships with the Network Advantage software license; Network Advantage adds advanced routing, segmentation and high-availability capabilities on top of Network Essentials. A Cisco DNA / Catalyst subscription is ordered together with the switch. It is well suited to enterprise wiring closets, branch offices and campus access layers where powered endpoints such as IP phones, Wi-Fi access points and security cameras need to be supported.
